

Interactive Software Portfolio

Course: SWE363

Lamees Alharbi

202256280

F-12

OVERVIEW

Page 02

- Dynamic personal portfolio website
- Showcases projects and technical skills
- Integrates APIs and interactive features

Motivation:

- Create a professional portfolio to showcase my work and skills

KEY FEATURES

Page 03

- API Integration:
 - Quotes API
 - GitHub API
- Project Logic:
 - Filtering, searching, sorting
- State Management:
 - Theme persistence
- UI/UX:
 - Responsive design
 - Animations and interactivity
 - Tech Orbit visualization (innovation)

TECHNICAL ARCHITECTURE

- HTML → structure
- CSS → styling and responsiveness
- JavaScript → logic and interactivity
- APIs → external data (GitHub + Quotes)
- Organized structure:
 - css / js / assets / docs

AI Integration:

Used for debugging, API integration, and code refinement

CHALLENGES & LEARNING

Page 05

- GitHub API rate limit issue
- Debugging async fetch errors
- Responsive design fixes
- Learned:
 - `async/await`
 - API integration
 - debugging techniques

CONCLUSION

- Fully functional deployed web app
- Demonstrates full course concepts
- Future improvements:
 - backend integration
 - authentication
 - more advanced features

Thank You
